

## Important Changes G.B. Henwood, K.C., Resigns; H. W. Wilson, K.C., Is Named Deputy Attorney General

Important changes in the set-up of the Alberta Regional War Labor Board, and in the attorney-general's department of the provincial government, were announced Tuesday by Premier Ernest Manning, minister of trade and industry. The changes and promotions, four in number, follow:

## Many Subs Sunk Early Assault On Europe Seen By MacDonald

By C. R. BLACKBURN  
OTTAWA, June 28.—(AP)—Mr. Malcolm MacDonald, United Kingdom high commissioner to Canada, said today that for the past fortnight "we have had a dead enemy submarine served up for breakfast every day" and prophesied that several German merchant ships in Europe will soon be sunk.

Mr. MacDonald said at a press conference the Allied powers are obviously approaching "another great crisis of the war."

He warned there might be "comparatively small" losses of many German-occupied territory, which should not at once be assumed to be the cost of a second front.

TURN TABLES ON SUBS  
Early anti-submarine efforts had been so successful in recent months that the tables had been completely turned on Axis undersea raiders in the North Atlantic, he added.

This condition was an "necessary prelude to an Allied assault on Europe. Another was the consequent shortening of the sea route to the Middle East."

Success in the war against submarines had been due to improved and increased air protection, to an increase in the number of cargo ships and escort vessels to convoy them; and to continued on Page 5, Col. 3.

## Second Nazi Spy Arrested in U.S.

NEW YORK, June 28.—(AP)—The federal bureau of investigation announced today the arrest of a second man on charges of espionage in gathering vital war information for the German high command.

E. E. Conroy, chief of the F.B.I. New York office, said that Erwin K. Spletzer, 34, was arrested and charged with conspiring with Ernest Frederick Lehmann, who admitted to being a German spy, and with the German high command.

Dr. Spletzer, a consulting engineer for the National Electric Light Association, was educated at the University of Heidelberg, furnished with technical information and other data concerning defense with the intention of helping the Axis.

Dr. Spletzer pleaded guilty when arrested before U.S. Commissioner E. Martin C. Epstein, who ordered him to pay for his defense a grand jury and fixed bail at \$50,000.

## Yanks Continue Blows at Kiska

WASHINGTON, June 28.—(AP)—Six more smashing aerial attacks were made against Japanese installations on Kiska Island in the Aleutians Sunday, the navy department reported today, and yesterday.

United States army forces followed up with a raid against that island and against Little Kiska.

In the south Pacific, meanwhile, a navy commander reported, U.S. forces bombed a Japanese naval base in the central Solomon Islands but did not observe results.

Sunday's raids on Kiska resulted in 22 bombs of separate air squadrons carried out over enemy North Pacific outpost in a four-day period.

## John Barrymore's Clothes Auctioned To Settle Claims

HOLLYWOOD, June 28.—(AP)—To help defray costs of legal claims remaining against the estate of John Barrymore, the wardrobe and furniture of the late actor were offered at auction today.

The shirt in which Barrymore, once ranked among the foremost Shakespearean actors, played Hamlet, went for \$1 as the auction opened last night.

## Mayor of Dublin DUBLIN, June 28.—(AP)—Mayor Martin O'Sullivan last night unanimously elected Lord Mayor of Dublin, becoming the first Catholic to hold the office.

## New Position

H. W. Wilson, K.C., whose appointment as deputy attorney-general for the Province of Alberta was announced Tuesday by Premier Ernest Manning, is succeeding H. J. Wilson, K.C., who is retiring from that post on June 30.

## On People, Goods Elimination of Canadian, U.S. Barriers Urged

WINDSOR, Ont., June 28.—(CP)—Elimination of customs and immigration barriers between Canada and the United States, to permit the free flow of goods and people across the international boundary, was urged last night by Hon. James H. Clark, K.C., speaker of the Ontario legislature.

He was addressing a Liberal luncheon which unanimously adopted a resolution in which the speaker urged the elimination of customs and immigration barriers between Canada and the United States.

Mr. Manning in announcing the changes in the War Labor Board, said his resignation, and that of Mr. King, had been approved by the War Labor Board.

## Hamburg Also Hit

## Cologne Is Heavily Bombed

By WALTER CRONKITE  
Exclusive to The Edmonton Bulletin  
LONDON, June 28.—British and Canadian bombers in great strength dropped over 2,000 tons of explosives on Cologne, industrial capital of the Rhineland, last night and a smaller force simultaneously hit Hamburg, Germany's biggest port, to send the record-shattering Allied air offensive through its 10th night.

The attack on Cologne, Germany's most bombed city, came while the Nazis were making strenuous efforts to rebuild its devastated industries. More than 1,000 bombs were dropped in previous raids, including a 1,000-plane assault last week.

Canadian pilots who went to Cologne reported that the exploding bombs kindled great fires which spouted black smoke 12,000 feet high and thick that it looked like a dense layer of heavy clouds.

## Thunderbolt Raid Hits Leghorn, Italy

Exclusive to The Edmonton Bulletin  
Copyright, 1943, by British United Press  
ALLIED HEADQUARTERS, North Africa, June 28.—One hundred American Flying Fortress launched a nine-minute thunderbolt raid on the Italian port of Leghorn, 200 miles north of Rome, yesterday, damaging a light cruiser and four supply ships and firing oil refineries, it was announced today.

Authorities believe the cruiser was being used as a training ship.

The raid came just one month to the day after a similar force of Flying Fortress hit Leghorn, which lies 50 miles southeast of Spezia on the Ligurian Sea, and damaged four ships, a large oil refinery and railway installations.

## Fewer Volunteers 67,000 Army "Eligibles" Not Located in Call Up Mitchell Informs House

OTTAWA, June 28.—(CP)—Labor Minister Mitchell last night told the House of Commons that about 67,000 men eligible for compulsory service were unaccounted for in the military call-up records, and said Canada was "near the bottom of the keg" in the matter of volunteers for the army.

He gave a revised account of the operations of the military call-up to remove misunderstandings arising from his statement of last week which led some critics to claim some 50,000 had failed to answer the call.

The great bulk of this number were in the armed forces as volunteers, the minister said. In the recent re-registration, some 140,000 names were obtained and about 55,000 were being taken into the forces.

### STORM OF CRITICISM

Mr. Mitchell's statement drew a storm of criticism from Hon. R. B. Hanson (Prog. Con., York-Sunbury), who claimed that the minister's policy remained one of "trial and error, hit or miss—and mostly miss."

John Diefenbaker (Prog. Con., Lake Centre), also strongly criticized the policy and its administration, renewing his claim that there was an inequality of compulsory call-up with Quebec, where there was much lower than any of the other provinces.

Paul Martin, parliamentary assistant to Mr. Mitchell, vigorously defended the administration and declared there was no rigid manpower policy and at the same time careful attention to individual cases, which was constantly demanded by the opposition.

The debate was carried on in committee of the whole on the labor department's \$2,500,000 share of the current fiscal year. Some progress was made.

### REVEALS NEW METHOD

Mr. Mitchell said a new method for getting recruits had been initiated, involving the use of industrial engineers to go about through industry "to question men suitable for military service."

The minister said steps had been taken to strengthen the enforcement officers in cases of non-compliance with regulations, empowering them to exact delinquents to a place of military service.

About 35 per cent of the men medically re-examined under national resources mobilization call-up regulations have been found to be acceptable for military training.

Mr. Mitchell said the medical re-examination by army medical boards, covering 150,000 men, was nearly completed.

"Approximately 35 per cent of the men re-examined have been found to be in an acceptable category to be ordered out for military training," said Mr. Mitchell, making his statement during discussion of the labor department's budget.

"Transportation, subsistence and lodging warrants are being issued to these men."

### "MOPPING-UP" STAGE

While most of the designated age classes had been examined for their work of the mobilization section would continue "in the mop-up" stage of the fact that mobilization is entering a stage of "mopping-up" so to speak, which must be carried out for the purpose of bringing into the armed forces all men liable to compulsory mobilization."

Mr. Mitchell said the total number of men unaccounted for under the call-up regulations numbered 67,000, or 61 per cent of the manpower pool. "In my opinion this is a credit to the men of Canada," he added.

He gave the following breakdown of figures:

In 1940, the men in the classes liable for compulsory military service numbered 1,043,165. As at May 1, this total was less 44,680 men in the process of being called, leaving a net of 998,475.

### 80,000 TO FORCES

From this pool, 590,892 men had gone to the armed forces, 100,973 were on postponement, 275,102 were unfit, 5,775 were in officers' training corps and auxiliary units, and 6,275 had statutory exemptions as firemen, policemen, clergymen, judges, enemy aliens or other categories.

Mr. Mitchell said the total of 87,814 men unaccounted for included those in institutional care and custody, merchant seamen, residents of remote areas, the dead, men not located because of unmodified change of address, and delinquents with duplications and errors in the 1940 registration also to be taken into consideration.

Reviewing the problem of training men, he said the work of mobilization had been hampered because so many failed to report changes of address. During the year ended March 31, national registration authorities received these notices at the rate of more than 60,000 a month, or a total of 779,278.

### SUGGESTS MEMBERS CHECK

"Sometimes we are critical of the man on the street in failing to comply with the regulations to complete change of address," said Mr. Mitchell. "But house members themselves should look up their registration cards and see if they themselves have complied with the law."

Mr. Mitchell: "Members of the house should share the law in the same way as the man on the street."

Mr. Cruckshank: "Is a member

## Daily War Map—Exclusively in The Edmonton Bulletin

Axis retreat from Mediterranean islands is indicated by arrows and in black. Ballons show distribution of German and Italian troops, according to London source, with shift in strength into Balkans.

### power policy at the start of the war.

"Canada did not settle herself mainly into this war in the first nine months," said Mr. Hanson. "The cause lies in the doorstep of the administration which was only for a passive participation in the war."

For support of that statement, he referred to the fact that Hon. P. G. A. Laidlaw, former minister of transport and public works, and at this stage "preferred at all," was being given to the prosecution of the war.

### NUMBER BY REGULATIONS

The number of men coming from any district or division was determined by the application of the mobilization regulations.

Every man in the designated class of military service was subject to the regulations, in the case of men who were receiving postponement on any of the grounds set forth in the regulations.

Divisions varied in size and had greater diversity in obtaining information and staff and therefore the speed of selection varied, but in the result was the same in that all men liable for service were called.

The staff concerned with compulsory mobilization had been in existence since last Aug. 1 by 1,515 new employees engaged for the local divisions. The total staff was 1,515.

### ISSUE CERTIFICATES

Action was taken after Dec. 1, 1942, to issue certificates to men in designated age classes to indicate compliance with mobilization regulations, and handling of the certificates was practically up to date in all 13 divisions.

Inspection of offices of the 13 mobilization registrars had revealed they were not in possession of a complete up-to-date set of national registration records, as many men who enlisted or changed their address without notifying their local divisions.

An immediate increase in co-ordination was attained between the National Registration Bureau and the 13 registrars, with the further information in connection with the tracing of men.

Mr. Mitchell said that in April an order was issued requiring selective service officers to check men on non-compliance of the mobilization regulations in all cases of men seeking permits for employment.

In cases of compulsory transfer of employment, men concerned were checked as to compliance with the mobilization regulations.

### SURVEY LABOR NEEDS

The mobilization survey division now was surveying impartially the needs of specific industries. This meant that in a specific industry the manpower was graded from skilled to unskilled, and at the same time a record was made of the physical fitness of the men involved.

"It is the intention that by means of these surveys the mobilization boards will be placed in possession of information respecting the supply of labor available, the importance of the industry in the national economy, and the prosecution of the war, and also the importance of the employer's position in the industry," said Mr. Mitchell.

"It is expected that by enforcing the compulsory transfer of unfit men through the facilities in the National Selective Service offices an adequate stream of replacements will be provided for those workers withdrawn to meet the needs of the armed forces."

"To date it has been found that these surveys have revealed already the whereabouts of certain men now in good standing under the regulations."

### HANSON CRITICAL

Hon. R. B. Hanson (Prog. Con., York-Sunbury) said the minister's statement was further evidence of the government's manpower setup was a matter of "trial and error, hit or miss—and mostly miss."

There were "thousands" who had been "absent" granted their own citizenship at a time when Canada at war was in its darkest stage. Because of a policy of appeasement and lack of a realistic manpower policy, the sort of thing was tolerated.

It was noted that there should have been an improved man-

### Canada Cuts U.S. Newsprint Quota

MONTREAL, June 28.—(CP)—Newspaper Administrator Guy E. Hoult announced yesterday that instructions had been sent to Canadian newspaper manufacturers which, if effect, would cut supplies to the United States to 80 per cent of the total for the third quarter of orders placed for July delivery.

Mr. Hoult said that U.S. newspaper orders for July, at 240,000 tons, "again substantially exceed the total deliveries of 210,000 tons which Canada has agreed to supply to the United States each month through the third quarter of 1943."

He added that the war production board was working on a plan which "it was hoped would be ready by July 15 and would be in effect at that time."

He declared that statement had never been regulated by Mr. Goldwell or any of his followers and he personally did not intend to let the P.C.F. party forget it.

Mr. Hanson said there was no equality of service as between provinces and said the figures for air force enlistments in Quebec as compared with Ontario were "shocking." He said he had the figures but could not reveal them until they were tabled in the house by Air Minister Power.

From the information so far given the committee, said Mr. Hanson, it would appear that some 50,000 persons were unaccounted for in National Selective Service records. If that was true it was a "national scandal."

Discussing the question of reinforcements, Mr. Hanson said he was alarmed over the possibility of Canadian forces overseas going into action without adequately-trained replacements.

There had been no satisfactory information on the adequacy of reinforcements, he said, and he believed the truth was "you haven't got enough and are afraid to say so."

### PERPETUATE HOME ARMY

He said the government was "perpetuating home army" men called up for service only in Canada, a system which now was a farce. "In view of the fact that a danger of invasion is long past."

These men in the home service army would never see any fighting. This army would never have been formed if the government had courage, said Mr. Hanson.

Paul Martin, parliamentary assistant to the labor minister, said there was general agreement that the administration was dealing with the most difficult problem that had ever faced a Canadian government. While some members still said there was no manpower policy, they complimented the minister and stressed the weight of the burden he carried.

Discussion of manpower policies in both British parliament and here was similar because the commodity being handled was "not milk bottles but human beings."

Even in those countries where the individual was treated as a commodity and not as a human being, such as Germany, there were manpower problems.

### AGREES TO CHARGE

He referred to Mr. Hanson's charge that the manpower policy was a day after affair, and asked how successful manpower administration in a democratic country could be anything but "day to day," or "evolutionary."

Mr. Martin said the figures of delinquents in Canada compared well with those for any other country, and did not justify the criticism which had been expressed.

Since the 1940 national registration there had been other detailed registrations, and when there was talk of a "faulty" 1940 registration these other registrations should be kept in mind.

### Civilian Trucks On Alaska Road Return to Sask.

REGINA, June 28.—(CP)—No more civilian trucks were required for construction work on the Alaska Highway and many Saskatchewan trucks being used on the road would return to the province shortly.

J. G. Pettigrew made this announcement Monday. He is truck control officer for Saskatchewan.

"The United States army has made available a number of heavy duty trucks for transporting materials and supplies," Mr. Pettigrew added. "These vehicles, supplemented by the trucks owned and operated by the construction contractors, will satisfy the marking requirements for the rest of the year."

The move was made to allow truckers to return to their former occupations in essential civilian duties.

## Allied Bombers Have Created Real Second Front in Germany

By HARRISON SALISBURY

Exclusive to The Edmonton Bulletin, copyright 1943, by British United Press

LONDON, June 29.—An analysis of German forces mobilized to meet the ever-growing Allied air attack on the Ruhr reveals that for the first time British, Canadian and American bombers have created something approximating a real second front in the heart of Germany's industrial empire.

The Allied air offensive is believed to be occupying the entire attention of Axis and forces nearly three times the size of those engaged in Africa, plus probably a third of Germany's day fighters, including the best available, and the entire Nazi fighter force.

The number of men and planes trying to hold off the Allies is difficult to figure. As early as April, British estimates of ground forces alone approximated 1,000,000 men. Germany probably has moved in substantially larger forces, including pioneer troops, anti-aircraft troops, searchlight forces, fire fighters, rescue workers, and disaster relief units.

Including the air squadrons based on northwest Germany and western Europe, it is estimated conservatively that the Germans have at least 1,500,000 men engaged in the futile effort to fend off the heavy Allied air blows.

An analysis of the Luftwaffe leads observers to feel German weakness in the Mediterranean theatre can be credited to the diversion of forces to the Ruhr.

### 18 Nippon Planes Attack Darwin

ALLIED HEADQUARTERS, Australia, June 29.—(CP)—Eighteen Japanese planes raided Darwin, Australia, Monday, the high command reported today, but only slight damage was caused. Two raiders were shot down.

It was the 50th raid of the war on Darwin.

Nine bombers escorted by an equal number of Zeros took part in the attack which came at midday. No casualties were reported.

Two fighters and two bombers probably were destroyed in addition to the two definitely shot down, the communiqué said. One defending plane is missing.

In the Allied offensive since the air force has been credited to the diversion of forces to the Ruhr.

The raiders at Cape Gloucester, New Britain, and a four-engine bomber on night reconnaissance bombed the dispersal base at Hapopo airdrome at Rabaul.

### Gunners requires considerable special training

Continuance of the Allied air offensive on a gradually increasing scale is expected to aggravate the strain on ground crews. Whether the Germans have reached the point where they have been forced to reduce ground batteries in areas outside the Ruhr is not known.

The Germans are known to maintain mobile fire fighting units which are trying to cover considerable radius by shifting units—such as big Canadian cities shift fire engines from station to station during a three-alarm fire. However, the increasing tendency of the R.A.F. and U.S.A.F. to attack two or even three targets the same night neutralizes the Nazi fire fighting mobility.

### GUNNERS PROBLEM

Wiping out of a factory frequently takes the gunners stationed to protect it. Thus it is thought the German force increasing trouble keeping a steady stream of trained ground gunners on hand. As yet

### 80,000 TO FORCES

From this pool, 590,892 men had gone to the armed forces, 100,973 were on postponement, 275,102 were unfit, 5,775 were in officers' training corps and auxiliary units, and 6,275 had statutory exemptions as firemen, policemen, clergymen, judges, enemy aliens or other categories.

Mr. Mitchell said the total of 87,814 men unaccounted for included those in institutional care and custody, merchant seamen, residents of remote areas, the dead, men not located because of unmodified change of address, and delinquents with duplications and errors in the 1940 registration also to be taken into consideration.

Reviewing the problem of training men, he said the work of mobilization had been hampered because so many failed to report changes of address. During the year ended March 31, national registration authorities received these notices at the rate of more than 60,000 a month, or a total of 779,278.

### SUGGESTS MEMBERS CHECK

"Sometimes we are critical of the man on the street in failing to comply with the regulations to complete change of address," said Mr. Mitchell. "But house members themselves should look up their registration cards and see if they themselves have complied with the law."

Mr. Mitchell: "Members of the house should share the law in the same way as the man on the street."

### Mr. Cruckshank: "Is a member

of the house who has not

been called up for military

service?"

Mr. Mitchell: "No, I do not

believe so."

Mr. Cruckshank: "Is a member

of the house who has not

been called up for military

service?"

service?"

Mr. Mitchell: "No, I do not

believe so."

Mr. Cruckshank: "Is a member

of the house who has not

been called up for military

service?"

### Director of U.S. Mine Operations

WASHINGTON, June 29.—(AP)—Interior Secretary Harold Ickes announced last night he had appointed Carl K. Eberhart, New York, 45-year-old president of the Chesapeake and Ohio Railroad Company, as director of mine operations for the United States government.

Ickes, as coordinator of the mine war, the government took over on May 1, designated Eberhart to head the organization charged with keeping coal production going until the labor crisis ended earlier this year.

The airdrome at Cape Gloucester, New Britain, and a four-engine bomber on night reconnaissance bombed the dispersal base at Hapopo airdrome at Rabaul.

### Gunners requires considerable special training

# Women Won't Talk

By RENE RYERSON MART

CHAPTER XIX  
AFTER lunch the four of us, Connie, Walter, Kathy, and I, went out on the east terrace. We were all littered from nervous strain and it was with relief that we saw long-legged Clint Mattison strolling up from the woods. Kathy hailed him and he came up on the terrace grinning his attractive grin.

Mattison remarked about the weather, said I was grand for something equally inane, and Kathy agreed with him so much in view that I sat up and noticed him. I watched her and Mattison and began to conjecture his attractive grin.

Mattison remarked about the weather, said I was grand for something equally inane, and Kathy agreed with him so much in view that I sat up and noticed him. I watched her and Mattison and began to conjecture his attractive grin.

Kathy said she couldn't find a guest coming and she'd be tied up for a few days. I noticed that she didn't tell Mattison who it was. Little Judy came bounding out on the terrace through the study door and ran up to Connie and hugged her tightly. Connie kissed her and asked her where Jack was. The cherub looked mysterious, and a worried frown creased Connie's forehead.

But Kathy laughed. She had glimpsed Jack and pointed him out to the rest of us. He had somehow escaped from Immagine's vine-latticed east end and had had another try at Clint Mattison's fishing net in the hall. Now, dragging a red head behind him he was slipping stealthily from the back hall door toward the lily pool at the far end of the east lawn. Kathy started to call to him but Mattison stopped her.

"Let him alone. He won't hurt the rod. Let's see what he's up to. From beginning to end of that."

## HOLD EVERYTHING

"I lifted my eyes from the gun and looked back at the sun splashed pool where Jack and Mattison had found it. It was an artificial pool, part of the landscaping of shrubs and evergreens that form a backdrop to the side lawn and reach from the circle of the driveway to the ravine some distance back of the spot where Derek's boat was found. If the person who had shot Derek wanted to return to the house without being seen, the most natural thing in the world would have been to follow the ravine back and then approach the back hall door using it for concealment just as Jack had done when he had been trying to reach the pool without being seen. It was clear in my mind as if I were seeing it actually happen. The murderer, sneaking back to the house, our house, passing within a few feet of the pool, which is deep at the far end and filled with lily pads, and on the impulse of a moment throwing the gun into the water hoping that it would never be found."

When undigested starch passes through the intestine it may ferment producing a condition which might be called starch indigestion. Those who suffer from large amounts of gas are usually those who are having trouble in digesting starch. As starches are favorable to the fermentation process which causes the liberation of large amounts of gas.

Anyone who is bothered in this way must use special precaution when eating starch to make sure it is entirely digested before reaching the large intestine. This is accomplished by observing the two following rules:

First, be sure to chew starch well, so that it is thoroughly mixed with the saliva. Much of the success of starch digestion depends upon this mixture, as the first step in the digestion of starchy foods takes place when the starches are mixed with the mouth secretion. When this mixture is thorough, the starch may continue to digest even after it reaches the stomach providing the stomach does not contain too much acid. If you eat only starchy foods, or starches with vegetables, the acid of the stomach is not encouraged to flow and will assist the digestion of the starch to continue for some time.

The second rule is to avoid using with starch foods which will too greatly stimulate the acid secretion on the part of the stomach. When you eat cheese, meat or other starchy foods, the stomach immediately begins to throw out the acid which is so necessary to proper digestion of proteins. The acid secretion of the stomach is also stimulated by the use of spices and seasonings. If you are troubled by starch indigestion accompanied by excessive gas, then I suggest that you do not take starches at the same meal with with meats, nor that you use starches and highly seasoned foods.

Another rule which is well worth observing while you are attempting to cut down on the tendency to form large amounts of gas, is the rule of not using starches and sugars together. While starch (as in bread and sugar) do not in themselves undergo alcoholic fermentation, they are capable of being sold up into tubers, which will ferment and which are producing of gas. The patient who is trying to observe the rule of not mixing starch and sugar will find it necessary to utilize sugar as a flavoring for breakfast cereals, puddings which are largely made from starch. Thickening with sugar, and also to stop taking drinks sweetened with sugar at a starchy meal.

The person in good health will probably say that he is able to use starch and sugar at the same time without any undesirable after-effects, but the person who is undergoing any kind of digestive discomfort usually finds this particular combination produces a great deal of trouble and will do well to avoid this combination for a time.

Those troubled with starch indigestion may discover that any starches prepared by being fried in oil will cause trouble. Such foods as pancakes, doughnuts, fried potatoes, and so on, should be avoided when any sincere attempt is being made to improve the digestion. The cooking oil or fat over the starch cells may keep the latter from being penetrated by the digestive juices, and the starch will then remain in a partially undigested state.

If you are interested in learning how starches should be combined with other foods I suggest you send for my article called "How to Combine Starches." The article on "Toasted Starches" should also be helpful.

All questions regarding health and diet will be answered. Large, stamped, self-addressed envelopes must be enclosed. Write on one side of paper only. Letters must not exceed 150 words. Address: McCoy Health Service, The McCoy Building, 1351 West 8th Street, Los Angeles, Calif.

## S. Africa Forces Start Recording

**JOHANNESBURG, June 28.**—(CP)—Armed forces of South Africa started yesterday to record their losses for the aggression against Marshal Smuts' wartime coalition government in the Dominion's general election set for July 7.

It is expected that close to 200,000 votes will be cast and forwarded to election officials for counting with the civilian ballots.

Votes will take place from the Cape of Good Hope to Cairo and even into Rorua and Palestine, and announcement of the general election result may be delayed for a fortnight after July 7.

Much of the success of starch digestion depends upon this mixture, as the first step in the digestion of starchy foods takes place when the starches are mixed with the mouth secretion. When this mixture is thorough, the starch may continue to digest even after it reaches the stomach providing the stomach does not contain too much acid. If you eat only starchy foods, or starches with vegetables, the acid of the stomach is not encouraged to flow and will assist the digestion of the starch to continue for some time.

The second rule is to avoid using with starch foods which will too greatly stimulate the acid secretion on the part of the stomach. When you eat cheese, meat or other starchy foods, the stomach immediately begins to throw out the acid which is so necessary to proper digestion of proteins. The acid secretion of the stomach is also stimulated by the use of spices and seasonings. If you are troubled by starch indigestion accompanied by excessive gas, then I suggest that you do not take starches at the same meal with with meats, nor that you use starches and highly seasoned foods.

Another rule which is well worth observing while you are attempting to cut down on the tendency to form large amounts of gas, is the rule of not using starches and sugars together. While starch (as in bread and sugar) do not in themselves undergo alcoholic fermentation, they are capable of being sold up into tubers, which will ferment and which are producing of gas. The patient who is trying to observe the rule of not mixing starch and sugar will find it necessary to utilize sugar as a flavoring for breakfast cereals, puddings which are largely made from starch. Thickening with sugar, and also to stop taking drinks sweetened with sugar at a starchy meal.

The person in good health will probably say that he is able to use starch and sugar at the same time without any undesirable after-effects, but the person who is undergoing any kind of digestive discomfort usually finds this particular combination produces a great deal of trouble and will do well to avoid this combination for a time.

Those troubled with starch indigestion may discover that any starches prepared by being fried in oil will cause trouble. Such foods as pancakes, doughnuts, fried potatoes, and so on, should be avoided when any sincere attempt is being made to improve the digestion. The cooking oil or fat over the starch cells may keep the latter from being penetrated by the digestive juices, and the starch will then remain in a partially undigested state.

If you are interested in learning how starches should be combined with other foods I suggest you send for my article called "How to Combine Starches." The article on "Toasted Starches" should also be helpful.

All questions regarding health and diet will be answered. Large, stamped, self-addressed envelopes must be enclosed. Write on one side of paper only. Letters must not exceed 150 words. Address: McCoy Health Service, The McCoy Building, 1351 West 8th Street, Los Angeles, Calif.

## S. Africa Forces Start Recording

**JOHANNESBURG, June 28.**—(CP)—Armed forces of South Africa started yesterday to record their losses for the aggression against Marshal Smuts' wartime coalition government in the Dominion's general election set for July 7.

It is expected that close to 200,000 votes will be cast and forwarded to election officials for counting with the civilian ballots.

Votes will take place from the Cape of Good Hope to Cairo and even into Rorua and Palestine, and announcement of the general election result may be delayed for a fortnight after July 7.

# World News Highlights Presented in Picture Form

Tom Boy

Considered the epitome of glamour, Ann Sheridan started out in life as a tom-boy. She romped and fought her way through school, always with high marks however. She went to Northwest State Teachers' College, intending to become a teacher. But Fate, in the form of her sister, Kitty, intervened. Kitty sent a picture of Ann to the editor of a paper seeking talent and beauty for Hollywood. The editor sent for her and sped her on her way to the movie capital. Starring in Westerns she seemed destined to be a horse-opera queen. Fate again came to the rescue in the guise of Warner Bros. Given a role opposite Pat O'Brien and Humphrey Bogart, Ann did such a good job that she never went "west-ern" again. She is currently to be seen in Warner Bros. "Edge of Darkness" with Errol Flynn.

One Dress That He'll Remember

Alexis Smith, glamorous star of Warners, models this exquisite white evening dress designed by Orry-Kelly. The wool crepe top has squared shoulders, fitted waistline and long sleeves. The skirt, which is beaded with white bugle beads, hangs from a lowered waistline. It is pencil slim, though slight gathers at the front give it a graceful swing.

Veteran "Memphis Belle" Comes Home

Hearty welcomes from Gen. Henry Arnold, U.S. Under Secretary of War Robert Patterson, and cheers from the crowd gathered at National Airport, Washington, greeted the veteran Flying Fortress "Memphis Belle" as she came home from the wars still carrying her original crew of 10 after surviving 25 bombing missions over Europe. The Belle, "wounded" but still airworthy, is pictured above with her crew. Left to right, front row, are: Staff Sgt. Casimir Naskal, Detroit; Staff Sgt. Clarence Winchell, Oak Park, Ill.; Tech. Sgt. Harold Loch, Green Bay, Wis., holding mascot "Stuka"; Staff Sgt. John Quinlan, Yonkers, N.Y. Back row, left to right: Staff Sgt. Cecil Scott, Altoona, Pa.; Capt. James Verina, New Haven, Conn., co-pilot; Secretary Patterson; Capt. Charles Leighton, East Lansing, Mich., navigator; Capt. Robert Morgan, Asheville, N.C., pilot; Capt. Vincent Evans, Henderson, Tex., bombardier; Gen. Arnold; Tech. Sgt. Robert Hanson, Garfield, Wash.

Bombing Italy's Big Toe

Reggio Calabria, at the toe of Italy's boot, has become a perpetual target of Allied bombers as they blast important ports on the Italian mainland. Here fire and smoke mark hits on the city's harbor area. Map locates Reggio.

Britain's King Reviews Yanks in Africa

King George VI of Great Britain is pictured as, escorted by Lt.-Gen. Mark W. Clark, commander of the American Fifth Army, he reviewed a division of U.S. infantry during his visit to North Africa. Later, a Yank combat team, in a dummy Arab village, put on a realistic demonstration of street fighting for His Majesty.

They Place Canada's Army Manpower

Officers whose responsibility is the placing of men in the Canadian Army jobs for which they are best fitted, shown gathered in Ottawa for a conference of district, divisional and command army examiners. Members of the headquarters staff of the Directorate of Personnel Selection are seen above. Seated, left to right, are Brigadier G. Brock Chisholm, M.C., director-general of medical services; Col. W. Line, director of personnel selection; and Lt.-Col. T. P. Sutton, of the D.P.S. Standing, left to right, are Major T. W. L. MacDermot, chief psychiatrist of the Royal Canadian Army Medical Corps; Lt.-Col. J. M. D. Griffin, R.C.A.M.C.; Lt.-Col. W. R. Wess, D.P.S.; Major N. W. Morton, D.P.S., and Major H. P. Spaulding, D.F.S.

Death in Bloom

Like a budding flower, death bomb explosion fans of behind P.C. boat that has just dropped the charge somewhere off Florida coast.

R.C.A.F. Pilots Battle Japs in Burma

Two Royal Canadian Air Force pilots check Mohawk fighter they fly in an R.A.F. squadron against the Japanese in Burma. On the wing in this picture, just received by bomber, is Pilot Officer R. Seifert, 863 Lipton Street, Winnipeg, while on the ground is Flying Officer F. Mendizabal, of Sarnia, Ont., who escaped from the Japs in Java by flying a matched-up Lockheed in one hop 1,200 miles to North Sumatra and then another of 1,400 miles to Ceylon. Mendizabal was a University of Toronto student before enlisting, studying chemistry and mineralogy. They operate their powerful American fighters from a landing strip in the dense Burma jungle.
